2009-2014 – Temelín tender

- 11/2009 ČEZ started tender for two additional reactors in Temelín NPP (beside two VVER1000).
 - Applicants: **Westinghouse**, Czech-Russian consortia MIR.1200 and Areva (excluded in 2012 – didn't comply with tender conditions)
- 4/2014 ČEZ canceled tender just after Czech government refused to guarantee the purchase price produced by reactors

2015-2024 – Dukovany tender

- Preparation of Dukovany tender started in 2015 – ČEZ subsidiary Elektrárna Dukovany II, EIA, nuclear authority approval, land use decision
- 3/2022 – tender started, EDF, KHNP and Westinghouse were addressed, maximal power output 1200 MW per reactor
- 10/2023 – final offers from applicants
- 1/2024 – Czech government asked EDF and KHNP for offer extension – binding offer on supply of 4 reactors, **Westinghouse wasn't asked for offer extension**
- 4/2024 – offers subscribed to ČEZ, 6/2024 ČEZ sent its recommendation to Czech government, 7/2024 government decision is expected

SMR from Westinghouse?

- ČEZ is preparing site for the Czech Republic first SMR beside Temelín NPP with the aim to start operation in 2032.
- ČEZ is actually considering choosing from three options: GE Hitachi, **Westinghouse** and Rolls-Royce.
- WEC on its Czech web site „Small modular reactor **AP300™** of Westinghouse company is the most advanced, proven and easily applicable SMR solution.“

Westinghouse and nuclear fuel

NPP Temelin:

- The contract with TVEL for the fuel supplies was for 10 years, ends in 2024
- New fuel supply: + **WEC Sweden - fuel RWFA-T**
+ Framatome - fuel TVSA-T.Mod.2
- WEC Sweden - was intended for 2024, implementation is expected in upcoming years, until 2026, due to design considerations, the persisting fuel supply from TVEL

NPP Dukovany:

- The contract for new fuel (NOVA E6 design) was signed 2023 with **Westinghouse**
- the preliminary plan is to load this fuel in 2026
- first delivery to the NPP Dukovany in 2024
